

SolarImmersion

AN INTELLIGENT SOLAR POWER DIVERSION MANAGER

Certified Electrical Compliance for Australia, New Zealand, Europe & UK

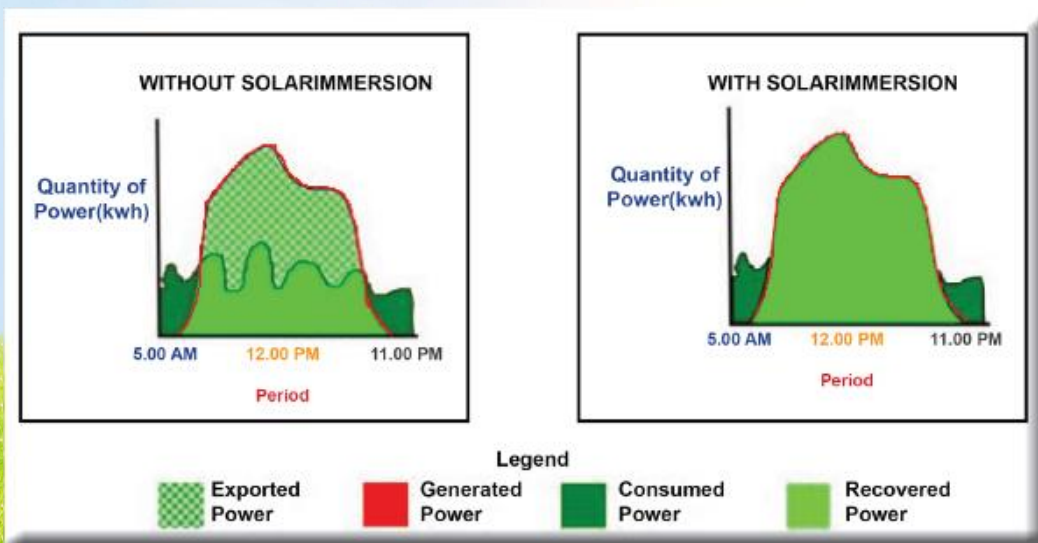

SIMPLE, EFFICIENT, AFFORDABLE

SolarImmersion optimises the efficiency of photo-voltaic and other micro-generation systems by preferentially diverting the free surplus power to your hot water cylinder or other resistive devices eg., spa pool heating, under floor heating, swimming pool heating, battery storage.

Efficiency and performance – use almost 100% of free generated power.

With solar PV, almost 50% of the energy is exported to grid. Utilise close to 100% of your FREE generated power by installing a highly efficient SolarImmersion unit.

MANUAL OVERRIDE / BOOST FUNCTION

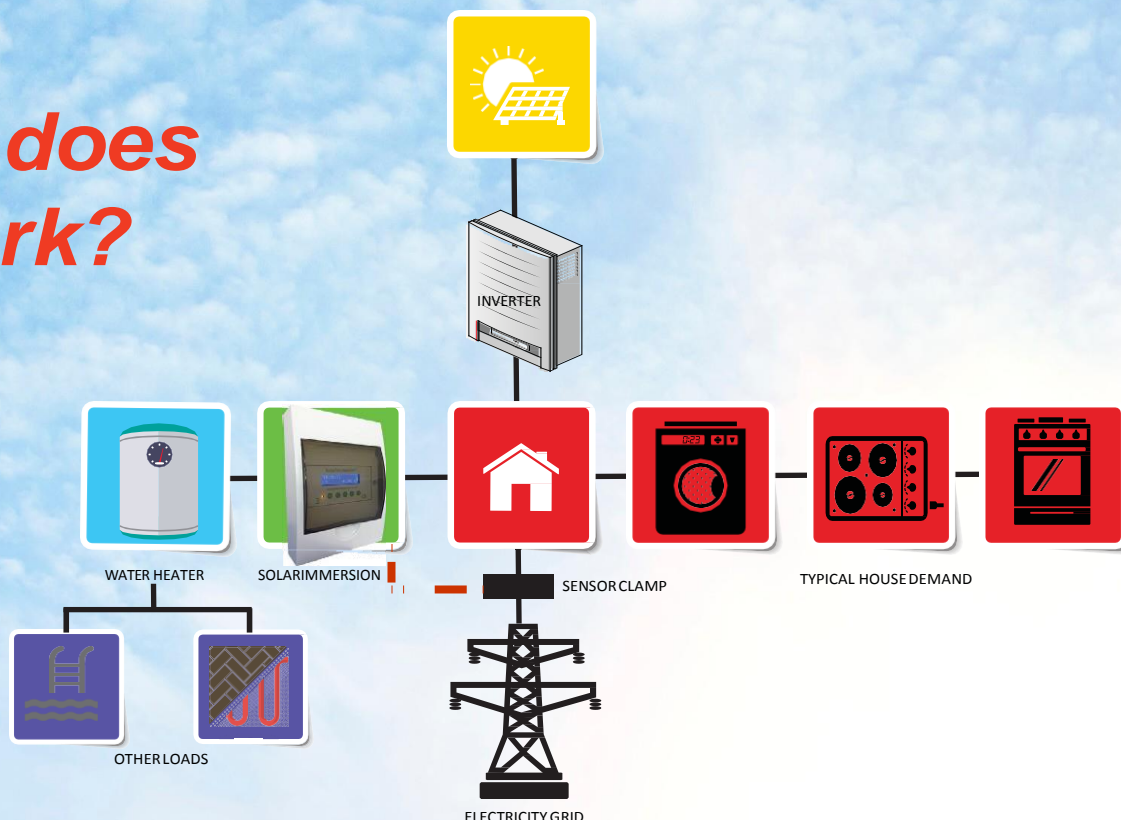

Inbuilt override/boost facility to turn the water heating on manually if required.

MULTIPLE LOADS

SolarImmersion can drive multiple loads, so when the water is hot enough and the thermostat cuts off, a second load could be activated.

Designed and Made in the UK. SolarImmersion is the leading PV water heating/solar hot water switch/controller manufactured in the UK.

How does it work?

Why you need SolarImmersion?

- Uses almost 100% of your free generated power
- Reduces your energy costs and bills
- Works with solar panels, wind and hydro
- Doesn't affect the solar PV system warranty
- No plumbing alterations required
- Maintenance free with no moving parts
- 1 year return to base warranty
- Easy installation by registered electrician
- Silent operation
- Works with grid tied solar installations
